Target Role: Product Design Intern | Job ID: PDI282506

PROFESSIONAL SUMMARY

Product-minded engineering student with experience building user-facing web applications, responsive interfaces, dashboards, and AI-assisted workflows. Strong at translating complex processes into clear screens, improving usability through iteration, and collaborating across product and engineering contexts with a practical understanding of frontend feasibility.

TECHNICAL SKILLS

Design & UX: User flows, wireframes, responsive UI design, dashboard UX, interaction design, usability improvement

Design Tools: Figma exposure, Canva, UI prototyping concepts, design system awareness

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap basics

Product Skills: Requirement analysis, user journey thinking, visual hierarchy, accessibility awareness, Agile collaboration

Developer Tools: Git/GitHub, VS Code, API integration, database-backed product workflows

EXPERIENCE

AI & Data Analytics Virtual Intern | *AICTE - Shell India - Edunet Foundation | Remote | Jun 2025 - Jul 2025*

- Converted raw data into 8+ visual dashboards and plots, focusing on clarity, readability, and stakeholder-friendly presentation.
- Analyzed 3+ sustainability use cases and communicated insights through structured visuals and concise documentation.
- Cleaned and organized 10K+ records, strengthening attention to detail and information architecture for data-heavy interfaces.
- Collaborated in a virtual internship environment, incorporating feedback and refining outputs across multiple deliverables.

PROJECTS

AI Job Guide | *Next.js, Gemini API, Neon DB, Tailwind CSS | 2026*

- Designed and developed responsive screens for AI interview preparation, resume generation, and cover letter workflows.
- Structured user journeys for job seekers from profile input to generated interview practice and career documents.
- Used Tailwind CSS and reusable UI patterns to keep the interface consistent, readable, and scalable across pages.
- Improved usability by simplifying complex AI outputs into clear actions, forms, and result views.

Chocolate Fund - Admin Payment Dashboard | *Full-stack project | 2026*

- Created admin-facing dashboards for real-time payment tracking, session monitoring, activity logs, and report access.
- Organized payment states, duplicate UTR errors, and validation feedback into actionable interface flows for administrators.
- Balanced dense operational data with clear hierarchy to support fast scanning across 3+ concurrent admin dashboards.

Garbage Classification | *Python, TensorFlow/Keras, OpenCV | 2025*

- Presented image classification results in a simple workflow that explains biodegradable and non-biodegradable outcomes.
- Used visual examples and result interpretation to make model behavior easier to understand for non-technical users.

EDUCATION

KL University, Hyderabad, India | Bachelor of Technology in Electronics and Communication Engineering - IOT | CGPA: 9.26 | Aug 2023 - May 2027

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- NPTEL Programming in Java
- Microsoft Azure AI Fundamentals (AI-900)
