Brahmatej Reddy Gayam

+91-7569673697 | 2320040010ece@gmail.com | GitHub: brahmatej-09 | LinkedIn: Brahmatej Reddy

Target Role: QA Engineer (Trainee) | Job ID: QAET282511

PROFESSIONAL SUMMARY

Entry-level quality engineering candidate with a strong programming foundation, full-stack project experience, and hands-on exposure to API-driven applications, databases, cloud fundamentals, and data validation. Comfortable analyzing requirements, debugging issues, documenting defects, and building reliable test scenarios for web applications and APIs.

TECHNICAL SKILLS

Testing Focus: Manual testing, functional testing, regression testing, API validation, bug reporting, test case design

API & Web: REST APIs, JSON, HTTP methods/status codes, webhook validation, Postman-ready API workflows

Programming: Java, C, C++, Python basics, TypeScript, JavaScript

Automation & Tools: Git/GitHub, VS Code, Selenium/JMeter concepts, CI/CD awareness, AWS fundamentals

Databases: MySQL, PostgreSQL, MongoDB, relational schema design

EXPERIENCE

AI & Data Analytics Virtual Intern | *AICTE - Shell India - Edunet Foundation | Remote | Jun 2025 - Jul 2025*

- Cleaned, validated, and preprocessed 10K+ records, improving data quality for downstream analytics and model testing.
- Tested classification/regression outputs using accuracy checks, edge-case review, and iterative debugging of feature inputs.
- Created 8+ dashboards and plots to verify trends, communicate results, and support issue analysis with clear evidence.
- Documented AI use cases, assumptions, and result observations for sustainable technology scenarios.

PROJECTS

Chocolate Fund - Payment Tracking Platform | *Full-stack project | 2026*

- Validated Razorpay webhook flows by checking UPI payment status, duplicate UTR handling, transaction records, and activity logs.
- Designed a normalized relational database with 5 entities and 10+ indexed fields to support traceable test data and audit checks.
- Built real-time admin dashboards with Pusher WebSockets, enabling immediate verification of payment updates across concurrent sessions.
- Added automated daily, weekly, and monthly reports, supporting regression checks for session lifecycle and reporting accuracy.

AI Job Guide | *Next.js, Neon DB, Inngest, Gemini API, Tailwind CSS | 2026*

- Built and tested an AI interview preparation platform with resume, cover letter, and personalized interview workflows.
- Integrated Gemini API and database-backed user flows, verifying API responses, form behavior, and generated output quality.
- Improved reliability by debugging frontend/backend issues across authentication, data persistence, and scheduled automation.

Garbage Classification | *Python, TensorFlow/Keras, OpenCV | 2025*

- Created an image classification pipeline using 1,000+ labeled images and validated model behavior on training and test samples.
- Analyzed prediction errors and preprocessing issues to improve model reliability for biodegradable/non-biodegradable classification.

EDUCATION

KL University, Hyderabad, India | Bachelor of Technology in Electronics and Communication Engineering - IOT | CGPA: 9.26 | Aug 2023 - May 2027

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- NPTEL Programming in Java
- Microsoft Azure AI Fundamentals (AI-900)
